

29/04/2024

Patient name: TEODOR VASILIKI MIRCHEV

Date of birth: 29/06/2017

Complaint: The testicles are not in the scrotum

Physical examination: There is a palpable undescended testis at the proximal of the bilateral inguinal canal.

Surgery plan:

The patient is planned to undergo bilateral orchiopexy surgery, including bilateral hernia repair at Biruni University Hospital (if necessary, laparoscopic exploration will be performed in the same session). The patient is scheduled to be hospitalized for one day.

Note: Total hospital cost for the bilateral undescended testis : 5000 Euro
