Overview of Medipol Mega University Hospital

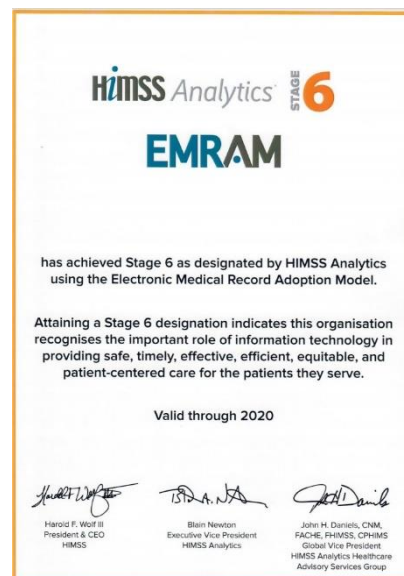

Medipol Mega University Hospital started providing healthcare services in July, 2012. It consists of 5 main complexes such as General Surgery Hospital, Cardiovascular Surgery Hospital, Oncology Hospital and Dentistry Hospital.

It has 810 beds capacity for inpatient treatment. To exemplify, there are 127 intensive care units which consist of 39 general, 53 new-born, 26 cardiovascular and 9 coronary intensive care units. The hospital provides services with 260 outpatient clinic room, 25 operating theatres and it comprises of 58 departments or disciplines together with their sub-branches. When the whole capacity is considered, it is the biggest private university hospital in our country.

Total personnel number of the hospital is 3002 and there are 315 medical doctors.

After the hospital came into service, it has received Joint Commission International (JCI) quality accreditation certification in a short time. At the same period, it has received "JCI Academic Accreditation" which has been put into practice for the hospitals performing educational and scientific works since 2013 by JCI, and Medipol Mega University Hospital became the first accredited hospital in Turkey.

Today, the hospital has the ultimate technologic devices for its medical infrastructure. Some of our technologic devices are 1.5 and 3 tesla MRI and 16 and 256 section CT in Radiology Department, PET CT, cardiac Spect, Spect CT and radioactive iodine treatment unit in Nuclear Medicine Department, 2 Linac (Trilogy and Truebeam), Gamma Knife and Cyberknife in Radiation Oncology Department and intra-operative navigation and intra-operative MRI in Brain Surgery and Orthopedics Department and 4 flat panel angiography devices, one of which is biplan, in Cardiology Department, and latest version of Da Vinci Surgery Robot.

The strongest part of Medipol Mega University Hospital is that it provides all serial technological devices and equipment which are needed for a department, and it has specialist physicians and auxiliary staff who have the necessary skills and experiment to use these devices. The hospital, having SSI agreement in all branches, has given service more than 1.100.000 outpatient as of today and it has been in service nearly 100% occupancy rate for the beds' capacity. Daily average operation number is 80, and advanced and complex surgical interventions are performed in every clinic. Some of these advanced surgical interventions are liver and renal transplantation; urology, gynecology, ear-nose-throat, general surgery, cardiovascular surgery interventions with the help of a surgical robot, pediatric brain surgery, epilepsy surgery, deep brain stimulation surgery in Parkinson and other movement disorders, advanced oncologic surgery, pediatric cardiovascular surgery, advanced surface dentistry and jaw surgery, and hearing and brain stem implant surgery. Adult and pediatric bone marrow transplantation center, IVF center, hearing and balance disorders center, sleeping center, traditional and complementary medicine center are our special units.

Moreover, Medipol Mega University Hospital carries out numerous projects together with Regenerative and Restorative Medicine Research Center (REMER) where molecular biology, genetics, medication works, cancer researches, stem cell and neurological studies have been conducted by many scientists who have international experience at Medipol University, Kavacak Campus. Medipol Mega University Hospital, having grown fast in a short time, takes firm steps forward to international medical tourism. Providing high-quality standards and affordable prices, compared to the other similar healthcare centers around the world, make Medipol Mega University Hospital an attraction center. International Patient Services consist of 230 personnel and the services are provided in 30 languages. The hospital hosted almost 25.000 patients in a year coming from Europe, Balkans, Russia, Georgia, Azerbaijan and other Turkic Republics especially for oncology, orthopedics, neurosurgery and pediatric cardiovascular surgery cases. It is foreseen that this number will be doubled in the next year. Besides, cooperations have been conducted together with various universities and health centers from above written countries demanding training at graduate and post graduate levels. The hospital will be having a bigger capacity with the additional building which has been partly completed.

Kindly submitted for your information.
